(Product identification)

Manufactured / imported by:

VELLEMAN NV.

Legen Heirweg, 33

9890 Gavere

Belgium.

This flat antistatic brush is an indispensable tool for cleaning and manufacturing electronics and products sensitive to static charges. Thanks to its antistatic properties, this brush prevents damage from static charges, allowing you to safely handle electronic equipment. The physical properties of the brush include bristles with a height of 25 mm and a width of 30 mm, ensuring thorough cleaning. The handle is made of durable PVC (polyvinyl chloride) for long-lasting use. With its sleek black design, this brush measures 14.2 cm in width, 4.5 cm in height, and 0.5 cm in depth, making it easy to handle and store. Whether you're an electronics enthusiast or a professional involved in the manufacturing of sensitive devices, this flat antistatic brush will meet all your needs.
